Table Design

Name: tbl_login

Primary Key: login_id

Field	Datatype	Description
login_id	int(11)	primary key
username	varchar(25)	username
password	varchar(25)	password
status	tinyint(4)	status of user

Name: tbl_users

Primary_Key: user_id

Foreign_key: login_id references tbl_login(login_id)

Field	Datatype	Description
user_id	int(11)	primary key
login_id	int(11)	foreign_key
name	varchar(35)	full name
email	varchar(45)	email
mobile	varchar(12)	mobile no
address	varchar(200)	address
pincode	int(6)	pincode

Name: tbl_products

Primary Key: prod_id

Foreign Key: cat_id references tbl_categories(cat_id)

Field	Datatype	Description
prod_id	int(11)	primary key
cat_id	Int(11)	foreign key
prod_name	varchar(35)	product name
description	varchar(55)	product description
prod_images	varchar(500)	product images
price	int(50)	product price
pquantity	Int(50)	product quantity
add_date	date	product add date
status	tinyint(4)	product status

Name: tbl_ categories

Primary Key: cat_id

Field	Datatype	Description
cat_id	Int(11)	primary key
cat_name	varchar(35)	category name
status	tinyint(4)	category status

Name: tbl_orders

Primary Key: order_id

Foreign_key: login_id references tbl_login(login_id)

Field	Datatype	Description
order_id	int(11)	primary key
login_id	int(11)	login id
order_date	date	order date
oquantity	Int(50)	order quantity
ls_delivered	tinyint(4)	delivery status
status	tinyint(4)	order status

Name: tbl_feedback

Primary Key: fid

Foreign_key: login_id references tbl_login(login_id)

Field	Datatype	Description
fid	int(11)	primary key
login_id	int(11)	login id
message	varchar(200)	user feedback
